Daily Task Log

Instructions

1. Update this document at the end of each workday (or start of the day for planned tasks).
2. Update the date with current date
3. Clearly highlight any blockers or questions needing attention.
4. Keep entries brief, clear, and actionable.

Daily Log

Date: Oct 31, 2026

- **Tasks Completed Today:**
  - Task 1 - Looked through several football websites to find more player data we could use.
  - Task 2 - Made a shortlist of good, reliable websites for getting player stats and info, and ran some Python scripts to test scraping data from a few of them.
- **In Progress / Planned for Tomorrow:**
  - Task 1 - Start testing which of these websites actually work well for collecting data automatically.
- **Blockers / Questions:**
  - Some sites (like Transfermarkt) block automatic data collection, so we may need another way to get that info.
- **Notes & Key Learnings:**
  - Simple, well-organized websites are much easier and safer to pull data from than sites built mainly for human browsing.
